

Raining Data Corporation extends Distribution Agreement with The DLA Group in South East Asia

SYDNEY, April 29, 2002--The DLA Group announced today that it has been re-appointed by Raining Data Corporation (Nasdaq: RDTA), formerly known as Omnis Technology Corporation, for a lengthy term to solely represent and distribute the OMNIS range of software products in South East Asia, Australia and New Zealand.

"Raining Data is pleased to continue our relationship with DLA. Since 1995, DLA has raised the visibility of our OMNIS products in Asia Pacific and delivered quality service with integrity and professionalism. We look forward to a successful relationship between our organizations as we continue to increase our market growth in the area", said Carlton H. Baab, President & CEO of Raining Data.

In Australia David Lewis, CEO of The DLA Group said: "We are delighted to extend our long standing relationship with the OMNIS product range now through the Raining Data Corporation. DLA's skills and experience continues to be invaluable to OMNIS developers worldwide and DLA is extending its reach into South East Asia.

Developers continue to seek out our products and services. We have doubled our developer numbers over the last 18 months and there is more to come!"

About The DLA Group

The DLA Group is an IT Management Consulting and software development company operating throughout South East Asia both directly and with partners and is expert in Strategic IT consulting services and Rapid Application Development (RAD). Corporate headquarters are located at 469 Darling Street, Balmain NSW 2041 Australia. Web: <http://www.dlagroup.com.au>.

About Raining Data

Raining Data Corporation, headquartered in Irvine, California, was created as a result of the December 1, 2000 merger of Omnis Technology Corporation and Pick Systems with over 175 employees in five countries. Raining Data's flagship products are: 1) Omnis Studio® -- a powerful, cross-platform, object-oriented rapid application development (RAD) tool that is ideally suited for developing sophisticated thick, thin, or ultra-thin client-based applications, and 2) D3® -- a multi-dimensional database management system that is the choice of thousands of application developers worldwide.
